- Advanced Smooth Contouring
- Standard Gcode Compatibility
- Positioning Accuracy +/- .005
- Optional T-slotted Aluminum Table
- 500 IPM speed
- Compatible with Sign Software

Recent studies show that a CNC Router is at the top of the list for new purchases for many small shops. If you always thought CNC Routers were out of your reach because of their price, then take a look at the DigiRout CNC Routers from Digital Cybermation.

Designed by engineers with over 20 years experience, the DigiRout brings a new era of exceptional value and affordability to CNC Routers. Industrial quality components and an engineered design combine in a machine that will give you the confidence to succeed with CNC technology, while at a price you can afford.
